DCIT 26 – Application Development and Emerging Technologies
Laboratory Manual

Name: Paredes, Paula M.

Course/Yr./Sec.: BSCS 3-3

Student No.: 202300779

Date: October 29, 2025

Laboratory Activity #3
Button, TextInput, and List

Laboratory Grading Rubric			
Criteria	Definition	Points Possible	Earned Points
Discussion	Student was able to follow directions given in activity	20	
Coding Skills	Student was able to develop a React Native application	30	
Scientific Understanding	Student demonstrated clear understanding of the science behind React Native	30	
Class Participation	This includes attendance and participation to class discussion	20	
Total		100	

Objective:

At the end of this topic, the students are expected to:

1. Understand the basic usage of states and props;
2. Accept user input using TextInput;
3. Use the Button to perform an action;
4. Display a list of text objects; and
5. Gain knowledge regarding the basics of React Native.

Instructions:

1. Create an application that will accept the user's input in a **TextInput** field.
2. When the **ADD button** is pressed, the entered text in the text box will be displayed below in a list format.
3. In your **App.js**, layout your app similar to the expected output shown below.
4. Set the placeholder of the **TextInput** component to "**Enter Item**".
5. Write the logic for the Button so that when it is clicked:
 - o **The entered text is added to the list.**
 - o **The TextInput field is cleared after adding the item.**
6. Explore and make your own design.
 - o You may change colors, fonts, layout, and button styles.
 - o Make your app creative and personalized.
7. Upload your project to **GitHub** following these steps:
 - o Create a branch named **Surname_lab3-branch**.
 - o Upload your React Native code files to this branch.
 - o Add a tag named **Laboratory3** to mark your first version of the code. Then attached the screenshot file (**Surname_Lab3_Output1.png or Surname_Lab3_Output.pdf**).
 - o Include the screenshot of your output in the repository.
8. Submit your work by providing the following through a private comment in Google Classroom:
 - o The GitHub repository link (with branch and tag)
 - o The Snack Expo project link
9. Submit your **Lab Manual** (in PDF or DOCX format) with the attached screenshot of your output in Google Classroom.)

Sample Output (Theme: List of Clothing Brands)

App Title: My Favorite Clothing Brands

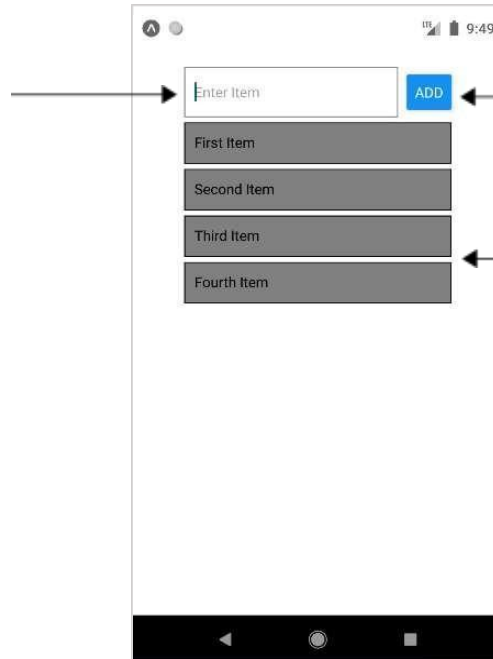

Description:

A simple React Native app where the user can add their favorite clothing brands to a list.

**Note: You can create your own theme.*

Expected Output

1. Enter user input

2. Add the entered text in the list of items and clear the TextInput afterwards

3. Display the list of items

Output:

snack.expo.dev/@pauparedes/paredes_lab3_output

Paredes_Lab3_Output
